[augustin.zip](#)

I'm a software engineer with 5+ years of experience in developing websites, mobile applications, browser extensions, NPM packages and VSCode extensions. I've started my career in 2020 by creating an open-sourced VSCode extension that has 78K installs.

I don't just focus on creating pixel-perfect designs, I also aim to enhance user experience by implementing animations and interactions. I place great importance on clean code and developer experience as I believe they have a significant impact on the quality of the product.

## Software Engineer[[getopenpay.com](#)]

2025-Now

OpenPay is a US-based payment orchestration and subscription management platform. I'm in charge of onboarding & self-serve billing, billing portal for subscription management, and PayPal payment processor. I work across frontend, backend, and SDK development.

I'm learning backend development and payment orchestration from a talented team. I have delivered major production-level features now used by thousands of users despite starting my role with zero Python experience.

## Senior Frontend Engineer[[codigo.co](#)]

2022-2025

Worked with international team across multiple time zones, from the US to SG. My responsibilities include building and maintaining various client and company websites, with a strong focus on design, performance, and SEO. I served as a technical bridge between our designers and clients.

I spent after office hours to improve company's codebase design quality and developed a frontend boilerplate to enhance the developer experience and project setup. Later, I had the opportunity to lead a frontend team of 5 for four months to finish the boilerplate. I've also led frontend team of 2 in building a CMS design system using design tokens.

## trifectasingapore.com

As the lead frontend engineer, I built and maintained 85% of website such as marketing pages, account management, and the checkout.

Lead Frontend Engineer   Green Field  
AWS   1K-5K users/day

## codigo.co

I rebuilt this in 2022 using Next.js, Tailwind. By analyzing SEO performance with Ahrefs and resolving issues, I achieved first-page search ranking.

Fullstack Engineer   Revamp   AWS  
SEO first-page rank

## boulderm.com

I built the newsfeed, pricing, account management and authentication feats.

2K-6K users/day   Green Field

## sudoaugustin/master

I password manager I built as a junior software engineer to practice my React and NodeJS skills.

Hobby   MERN Stack

## sudoaugustin/socialpay

SocialPay is a Myanmar-focused mobile payment app that lets users send and receive money. It was an experiment to integrate social features into a payment app.

Academic   Software Architect  
Fullstack Engineer

## rezerv.co

Rezerv is Shopify for fitness studios allowing booking management. I built their theme engine to support business to build custom website.

Frontend Engineer   20K-60K users/day

## neuroglee.com

I built various type of animations, such as line drawing and scroll-based transitions. This project sparked my interest in design engineering.

Frontend Engineer   Green Field  
Animation   Rendering optimization

## techforhire.dev

I built this as a FullStack engineer using Next.js, Prisma and AWS SES.

Fullstack Engineer   AWS   Green Field

## sudoaugustin/bazar

E-commerce platform built as a junior software engineer to practice my Laravel skills.

Hobby   Laravel

## sudoaugustin/share-care

ShareCare is donation platform for donors and welfare centers to create posts, connect, make payments, and track donation items.

Academic   Software Architect  
Fullstack Engineer

## skel-ui.augustin.zip

A lightweight and powerful skeleton library for React and React Native. It is built on learnings from existing skeleton packages with improvements.

300-400 weekly downloads

Monorepo

## qr-x.devtrice.dev

Universal QR that supports all popular frontend libraries.

SolidJS

VueJS

Monorepo

Storybook

## favicon-pro

Fetch the best quality favicons of websites.

## supex.dev

Next.js like build-tool for cross-browser extension development that support Vanilla, Typescript, React and SolidJS.

Build Tool

React

SolidJS

## renex

Useful React utility components to avoid unnecessary component creation.

Unit Testing

## tailwindcss-shorthand

Useful tailwind shorthand classes and variants to boost productivity.

## TailwindCSS Transpiler

A VSCode and Atom editor extension that compiles Tailwind files into pure CSS files.

78K installs

## Tailpile

Light weight and fast successor of TailwindCSS Transpiler.

6K installs

## VSLook

A no-code VSCode extension that let developers create custom extension.

10K installs

Featured on ProductHunt

## Portal

A cross-browser extension that allows users to embed websites in homepage instead of favicons.

Supex

ReactJS

## University of Greenwich

2024-2025

I completed B.Sc(Hons) in Computing at the University of Greenwich, graduating with first-class honors.

## NCC Education

2023-2024

I achieved the Level 5 Diploma in Computing, awarded by NCC Education and regulated by Ofqual UK.

## University of Information Technology

2017-2019

I studied at UIT, rank 1 university for computer studies in Myanmar. I studied Data Structures & Algorithms, Calculus, Networking, Information Security, Database Fundamentals, and programming languages such as C++, Java and PHP.

My project, EPay developed using JS, SQL and PHP received Technical Award at WIT 2019.

I'm one of the employees of the year at Codigo in 2023.
